Nozzle extensions are used for easy reaching remote areas in coatings. Eurotechnik offers standard lengths for nozzle extensions from 15cm to 300cm. Nozzle extensions and angle head are available for KS1 (with M18x1 thread) and additionally with the thread 11/16" (suitable for Wagner etc.), 7/8" (suitable for Graco etc.) and M18x15 (suitable for Kremlin etc.).

These extensions fit to all Airless guns of Kopperschmidt and Eurotechnik series, but also to the most common airless guns from other manufacturers. Depending on the application nozzles like (standard airless nozzle with or without pre-atomizer, fine finish nozzle, round spray nozzle, reverse tip nozzles or adjustment nozzle etc.) cause used with retainer nut with or without touch guard.
