High Pressure - Airless - Circular Spray Pattern Nozzles with TC Core

The Circular Spray Pattern Nozzles TNS consist of a rugged TC core and offer a circular spray pattern with fine material drops. The material distribution is very even and, depending on the material, it can become even very fine fog of material.

In paint spraying applications, this type of spray pattern with fine material distribution is perfect for internal pipe coating and similar applications.

Bore in mm	Volume in l/min	Pattern width in mm	Part - Number
0,34	0,30	76	15916 034076
0,41	0,35	76	15916 041076
0,51	0,38	89	15916 051089
0,51	0,57	90	15916 051090
0,71	1,13	152	15916 071152
1,10	1,52	203	15916 107203
1,50	3,03	305	15916 152305
1,50	3,42	356	15916 152356
1,60	3,80	406	15916 163406
1,90	5,32	356	15916 193356
2,10	7,60	457	15916 206457

The values for the volume listed above are determined with water at 100 bar.

The values for pattern width are based on a liquid with a viscosity of 20sec, determined with a DIN 4mm cup and at a material pressure of 110 bar.
