Paintflex hose for  
200 liter barrel

Suction system with  
chemical hose for  
200 liter barrel

Suction system with  
Paintflex hose for  
Hobcock straight pipe

Suction system with  
chemical hose for  
Hobcock straight pipe

### Chemical hose:

Suction systems flexible in the version with chemical hose are available in different hose and pipe lengths with suction pipes made of stainless steel and suction strainer.

The chemical hose is solvent-resistant due to the inner core made of polyethylene, it is thick-walled and therefore very rugged.

### Paintflex hose:

The Paintflex hose is the cost-effective alternative to the chemical hose and is often used in the craft sector, where the conditions don't get so rough.

The inner core is made of polyethylene and is just solvent-resistant as the chemical hose, only the Paintflex hose is a bit thin-walled.

Suction systems flexible with Paintflex hose are also available in different hose and pipe lengths with suction pipes made of stainless steel and suction strainer.
