KS20850 Diaphragm pump with
swivel connection 4,5 liter

KS20850 Diaphragm pump with hopper 4,5 liter

M2001 Piston pump with
swivel connection 4,5 liter

Suction system swivelling:

The suction system with swivel connection 4,5 liter are designed for attachment to M2001 piston pumps or KS20850 diaphragm pumps. Small quantities of material up to 4,5 liter can be used up economically and effectively.

Suction system hopper 4,5 liters direct assembly:

The suction system with a hopper 4,5 liter is specially designed for KS20850 diaphragm pumps. In order to do this, the pump must be installed "upside down" (with the suction side up).

The diaphragm pump receives a direct material flow of up to 4,5 liter through the hopper, which are used up to the last drop.
