The Kopperschmidt Classic Line transfer pumps

P2001 pumps are powerful, compressed air operated piston pumps for stationary use; appropriate for solvent- and water-based liquid materials, all material contact parts are made of stainless steel. The rugged designed machine is state of the art, easy to use and a high-quality tool.

Technical Data:

Description

P2001-7.340 > ratio 7:1, 680ccm/DS, 40 liter/min, 55 bar Material pressure at 8 bar Air pressure max

P2001-10.340 > ratio 10:1, 680ccm/DS, 40 liter/min, 80 bar Material pressure at 8 bar Air pressure max.

DS= double stroke

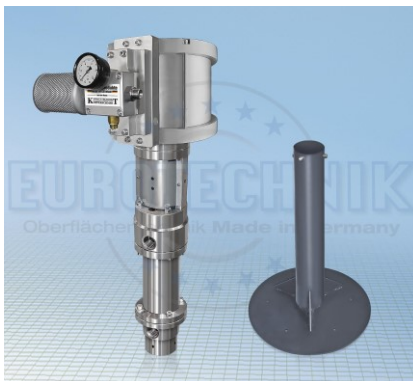

The basic version consists of the pump P2001 (*floor mounting with stand or wall mounting with mounting bracket*), silencer and safety valve.

P2001-7.340 for floor mounting

P2001-7.340 for wall mounting

P2001-10.340 for floor mounting

P2001-10.340 for wall mounting

Accessories and attachments parts

Low pressure filters in different dimensions and volumes.
Also fitting filter screens and inserts.

Suction systems

- Flexible hose for Hobbock or 200 liter barrel

Pneumatic accessories

- Air pressure regulator

Mounting types

- wall mounting
- floor mounting
