KOPPERSCHMID

The Kopperschmidt airless spray gun KS1-DD (with long trigger lever) suitable for highly viscous or paste-like materials at pressures up to 250 bar.

The KS1-DD is available with rigid connector G1/4" or 3/8". Alternatively with the extremely smooth-running ball bearing swivel enables fatigue-free working and easy handling.

Because of the aluminum handle the KS1 is light weighted and easy to handle. For a wide range use of KS1, all material contact parts are made of stainless steel.

Another useful accessory for the KS1 (DD) are the nozzle extensions with optional angular head.

- complete made of stainless steel
- available in different lengths

Nozzle extensions are used for easy reaching remote areas in coatings. Eurotechnik offers standard lengths for nozzle extensions from 15cm to 300cm.

Nozzle extensions and angular head are available for KS1 (with M18x1 thread) and additionally with the thread 11/16" (suitable for Wagner etc.), 7/8" (suitable for Graco etc.) and M18x15 (suitable for Kremlin etc.).
